Invasive Insects of Oregon

Holly bud moth

Fall webworm

Dog wood sawfly

Clay colored weevil

Alder flea beetle

Crane Fly

Mexican Bean Beetle

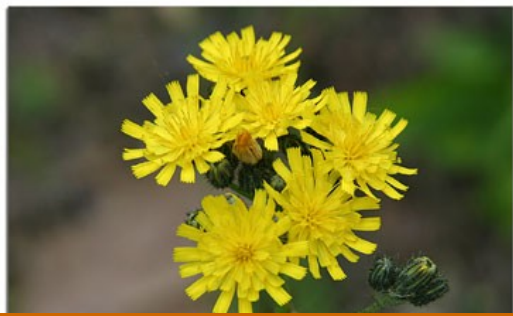

Japanese Beetle

How Not to Spread Invaders

- Thoroughly clean all of your equipment on location.
- You should not re-plant any live plants that are known as invasive.
- You should not let any class pets that are invasive out.
- You could freeze them
- You could burn them

Scotch Broom

Yellow Hawkweed

Invasive Plant of Oregon

Yellow Flag Iris

Parrot Feather

Yellow Starthistle

English Ivy

Field Trips

When you take your class on field trips you need to keep a close eye on your students and clean your equipment so you do not spread any type of invasive species in other vulnerable places. You should power wash the school bus after you have driven through invasive species rich areas, so there is NO dirt or sediments visible.

Purple Loosestrife
